

# *Sculpting Memories in Stone and Water*

Icons of Peace

## The Giant Floating Stone Sphere Water Fountain

We would like to introduce you to an exceptional stone sculpture and water feature, the Giant Floating Stone Sphere Water Fountain, BOLAS DE GRANITO. Imagine hundreds, even thousands of pounds of granite, cut and polished within thousandths of an inch, mounted on a specialized water bearing, capable of *floating and freely rotating as the water lifts and turns the sphere*. We sculpt, distribute and install these Giant Granite Spheres. *Many sizes are available* with sphere diameters from twelve inches to nearly ten feet, one hundred to over 85,000 pounds with matching stone base units. *Custom designs are welcomed.*

Perfect for:

## **PUBLIC ART & DONOR RECOGNITION PROJECTS**

In comparison to other water features available, ours can be completely *interactive* with the viewer.....the sphere, no matter its size, is safe to be touched and *easily moved even by children*. Spheres of all types are inherently attractive to human beings. Our fountains are magnetic to both children and adults, giving us the fame as producing the *most remembered water fountain in the world*. No one that views one of these spheres forgets what they have seen or where they have encountered this amazing experience.

We fully cooperate with special pricing to the trade. If we can explain more to you about potential applications for this water feature, pricing and related programs, please contact our Los Angeles office. Upon your request, an architectural rendering CD is available for your further review. Please visit our website at [www.waterfountains.com](http://www.waterfountains.com).

The Sculpting Team, Waterfountains.com, Inc.
